

Delivery Type

- Instructor-Led Training (ILT)

Course Length

- 2 days

Course Availability

- Employees
- Partners

Suggested Audience

- Install and Support

Required Knowledge and Skills

- Knowledge of Networking (VLANs, IP), DNS, Active Directory and Hitachi VSP Gx00 Management

Prerequisite Courses

- None

Supplemental Courses

- TSI2565 - Managing Hitachi Storage with Hitachi Command Suite v8.x

TCI2741 - Installing and Configuring Hitachi Content Platform v9.x

Course Description

This course provides an overview of Hitachi Content Platform (HCP) features along with detailed step-by-step procedures to install and configure it in a typical customer environment. The course explains storage provisioning for HCP, pre-installation procedures and the most essential maintenance tasks.

Hands-on lab activities provide the opportunity to install an HCP cluster, HCP S10 node and HCP VMware edition, as well as to perform essential maintenance procedures.

This course prepares you for the following Hitachi Vantara Qualified Professional qualification test:

- Hitachi Vantara Qualified Professional - Content Platform installation (HQT-4420) Exam

Depending on the location and course delivery format, this closed-book, proctored qualification test may be offered and administered by the instructor at the conclusion of this course, using the [Kryterion Webassessor system](#). It is also available at Kryterion testing centers.

Course Objectives

When you complete this course, you should be able to:

- Discuss the current HCP products
- Identify HCP components and field replaceable units (FRUs)
- Perform network and storage configurations
- Install an HCP system
- Support an HCP system and perform maintenance functions

Course Outline

Content Modules

- Hitachi Content Platform Products
- Hardware Components and Field Replaceable Units
- Hitachi Content Platform Initial Network and Storage Configuration
- Installation
- Architecture and Maintenance
