

## TXI3684 — Managing Hitachi Ops Center Analyzer

### Delivery Type

- Instructor-Led Training (ILT)
- Virtual Instructor-Led Training (VILT)

### Course Length

- 3 days

### Course Availability

- Customers
- Employees
- Partners

### Suggested Audience

- Administration

### Required Knowledge and Skills

- Good knowledge of Hitachi storage systems hardware and storage management
- Basic knowledge of Hitachi Ops Center
- Basic understanding of block storage
- Basic knowledge of servers, fibre channel, storage networking, operating systems and file systems

### Prerequisite Courses

- None

### Supplemental Courses

- TSI2929 - Managing Hitachi Ops Center Administrator

### Course Description

This course provides knowledge about the performance metrics and concepts required to perform analysis, monitorization and health-checks using Hitachi Ops Center Analyzer products. You will learn about Analyzer, Analyzer detail view and Analyzer Probe and its unique features and tools to perform a complete datacenter performance analysis.

Additionally, the hands-on lab activities enable you to gain practical experience and knowledge about Hitachi Ops Center Analyzer. You will learn how to use the different tools working with real performance scenarios.

This course prepares you for the following Hitachi Vantara Qualified Professional qualification test:

- Hitachi Vantara Qualified Professional – Ops Center Analyzer management (HQT-6771)

Depending on the location and course delivery format, this closed-book, proctored qualification test may be offered and administered by the instructor at the conclusion of this course, using the [Kryterion Webassessor system](#). It is also available online (online testing) and at Kryterion testing centers (onsite testing).

### Course Objectives

When you complete this course, you should be able to:

- Give an overview of the Hitachi Ops Center Analyzer software architecture, functionality and key features
- Describe a Hitachi Ops Center Analyzer initial setup procedure
- Identify the metrics used to monitor and troubleshoot storage performance and how to manage thresholds for these metrics in Hitachi Ops Center Analyzer detail view
- Manage Performance View of Hitachi Ops Center Analyzer detail view
- Describe how to create and manage performance reports and advanced custom reports in Hitachi Ops Center Analyzer detail view

### Join the Conversation

Ask questions and connect with other Hitachi Vantara customers, partners and employees within the Hitachi Vantara Community.

[Community.hitachivantara.com](https://community.hitachivantara.com)

- Use Dashboard and alerts definitions for a proactive performance monitorization in Hitachi Ops Center Analyzer detail view
- Explain how resources are managed in Hitachi Ops Center Analyzer
- Describe how to customize Hitachi Ops Center Analyzer to monitor the performance of data center resources
- Identify the tools provided in Hitachi Ops Center Analyzer to help analyze the performance of data center resources
- Describe the methodologies used with Hitachi Ops Center Analyzer to perform health checks

### Course Outline

#### Content Modules

- Hitachi Ops Center Analyzer Overview
- Initial Setup
- Performance Monitoring
- Analyzer Detail View Performance View
- Analyzer Detail View Reports Management
- Analyzer Detail View Dashboard and Alerts
- Customizing Analyzer
- REST API (Optional)
- Health Check with Analyzer

#### Learning Activities — Labs

- Analyzer Overview
- Initial Setup
- Performance Monitoring
- Detail View Performance View
- Detail View Reports
- Detail View Dashboard and Alerts
- Customizing Analyzer
- Health Check with Analyzer
