### Course Description

This course provides information on how to use Hitachi Ops Center to manage the Hitachi Virtual Storage Platform family. From analytics and monitoring to automation, administration and data protection, this course will show you how Ops Center can optimize the storage in your data center.

Additionally, hands-on lab activities enable you to gain practical experience and knowledge on administering and provisioning the infrastructure management suite.

This course prepares you for the following Hitachi Vantara Qualified Associate qualification test:

- Hitachi Vantara Qualified Associate – Ops Center Operations (HQT-6751)

Depending on the location and course delivery format, this closed-book, proctored qualification test may be offered and administered by the instructor at the conclusion of this course, using the [Kryterion Webassessor system](#). It is also available online (online proctored) and at Kryterion testing centers (onsite proctored).

### Course Objectives

When you complete this course, you should be able to:

- Recognize the hardware platforms supported by Hitachi Ops Center
- Perform Ops Center common services functions on the Ops Center dashboard
- Describe the storage management functions of Ops Center
- Perform the key analytics and storage management functions of the different components of Ops Center
- Explain basic maintenance procedures on Ops Center
