Managing Hitachi VSP Midrange Storage with Embedded GUI
1045CI

Who Should Attend

- Administration

Level
- Associate

Required Knowledge and Skills

- 1064CC – Getting Started with Hitachi Vantara

Prerequisite Courses

- None

Supplemental Courses

- TSI2929 - Managing Hitachi Ops Center Administrator
  OR
  TSB2929 - Intensive - Managing Hitachi Ops Center Administrator

Delivery Type

- Instructor-led Training (ILT)
- Virtual Instructor-led Training (vILT)

Course Length

- 1 day

Course Description

This course focuses on basic administration and provisioning tasks associated with Hitachi Virtual Storage Platform (VSP) midrange products using the embedded GUI management software. You will explore the embedded GUI dashboard features and learn to create and edit pools, volumes, servers and manage ports. Additionally, the course explains when to use the embedded management software and other options such as Hitachi Ops Center and command line interface.
The course offers various hands-on lab activities which will enable you to practice common storage operations in a safe virtual environment using the management software.

Course Objectives

When you complete this course, you should be able to:
- Explain the features of embedded management software and its operations
- Provide a high-level overview of the components of VSP midrange, which are directly related to the management software
- Provide a comparison to show the features of Embedded GUI With Ops Center
- Briefly describe how REST API CLI can be used to perform same functions and when it can be used
- Compare the features of embedded GUI with Hitachi Ops Center

Course Outline

Content Modules

- Overview of Hitachi VSP Storage with Hitachi Management Tools

Learning Activities — Labs

- Overview
- Creating Pools
- Creating Volumes
- Registering Servers
- Managing Ports
- Getting familiar with Ops Center Administrator
