

Transitioning to Hitachi VSP One Block High End

1523PI

Who Should Attend

- Field Engineer
- Storage Administrator

Level

- Professional

Availability

- Partners
- Employees

Required Knowledge and Skills

- Storage concepts

Delivery Type

- Instructor-led
- Virtual Instructor-led

Course Length

- 4 hours

Maximize the effectiveness of your data storage solutions

This intermediate course offers a technical introduction to the Hitachi Virtual Storage Platform (VSP) One Block High End series. It covers the differences in hardware configurations and specifications from previous VSP Enterprise models, as well as the maintenance and configuration changes for new and various components.

During this course, you will engage in numerous hands-on lab activities to develop the skills needed to understand the key storage products discussed.

Course Objectives

When you complete this course, you should be able to:

- Describe the architecture of Hitachi Virtual Storage Platform (VSP) One Block High End systems
- Discuss the specifications of the VSP One Block High End systems
- Identify the internal components and their functions
- Describe the back-end design and layout for each model, including drive boxes and drive types
- Describe the different management GUIs available for Hitachi Virtual Storage Platform (VSP) Block High End systems

Your roadmap to professional growth starts here!

Course Outline

Content Modules

- Overview
- System Architecture
- System Components
- Back-end
- Maintenance
- Management Tools

Learning Activities — Labs

- Component Identification
- Back-end Architecture
- Maintenance
- Change Configuration (optional)
- Management GUIs
